This is a demo manuscript. The tables are graphs are non-relevant to the project itself and are for practice only.

Equations

I can have in-line equation $\alpha = \beta$ Or start at a new line

$$\alpha = \beta$$

```

We used R version 4.4.1 (R Core Team 2024) and the following R packages: janitor v. 2.2.0 (Firke 2023), knitr v. 1.48 (Xie 2014, 2015, 2024), palmerpenguins v. 0.1.1 (Horst *et al.* 2020), prereg v. 0.6.0 (Aust & Spitzer 2022), rmarkdown v. 2.28 (Allaire *et al.* 2024a; Xie *et al.* 2018, 2020), rticles v. 0.27 (Allaire *et al.* 2024b), tidyverse v. 2.0.0 (Wickham *et al.* 2019).

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
